Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg Locks BL5451 is a medium to heavy-duty mechanical digital lock featuring back-to-back keypads and a tubular latch. Designed for double-sided access control, this lock requires a code for both entry and exit, making it ideal for internal doors and sheltered external areas where two-way security is essential.

Each keypad operates with independent coding chambers, allowing you to set different codes for entry and exit if required. The BL5451 features a fully clutched, flat bar lever handle designed to prevent damage from forced entry or abuse. For added convenience, it includes an optional free passage mode, allowing you to temporarily bypass the coding mechanism for unrestricted access.

This versatile lock is non-handed and easily reversible on site, suitable for timber, composite, and steel doors. It is available in a choice of finishes - including Satin Chrome, Satin Stainless, Polished Brass, and Polished Chrome - and with either a 60mm or 70mm backset tubular latch. Please select your preferred finish and backset size from the options below.

Technical Specifications

- **Series:** Borg BL5000 Series
- **Lock Type:** Mechanical digital lock with back-to-back keypads
- **Latch Type:** Tubular latch
- **Backset Options:** 60mm or 70mm (please choose from the options below)
- **Finishes Available:** Satin Chrome (SC), Satin Stainless (SS), Polished Brass (PB), Polished Chrome (PC) (please choose from the options below)
- **Handle Style:** Flat bar lever handle
- **Code Combinations:** Over 8,000 potential combinations per keypad
- **Door Compatibility:** Suitable for timber, composite, and steel doors
- **Handing:** Non-handed (easily reversible on site)
- **Usage:** Suitable for internal and sheltered external applications

Key Features

- **Double-Sided Access Control:** Back-to-back keypads require code entry for both entry and exit.
- **Independent Keypads:** Separate coding chambers allow different codes to be set on either side.
- **Clutched Handle Protection:** Fully clutched flat bar lever handle prevents damage from forced entry or vandalism.
- **Optional Free Passage Mode:** Bypasses the coding mechanism to allow unrestricted access when required.
- **Durable Construction:** Extensively cycle tested for long-lasting reliability in medium to heavy-duty environments.
- **Versatile Options:** Multiple finishes and backset sizes available to suit your specific door requirements.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
