Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg Locks BL7000 Marine Grade Pro with Easicode Function (BL7000 ECP) is a heavy-duty mechanical digital lock designed for high-traffic areas in demanding environments. Featuring the specialised Black MG Pro 2 finish, this unit has been salt-spray tested for over 1,000 hours, providing exceptional UV and weather protection for external installations.

Equipped with the patented Easicode Pro (ECP) system, this lock allows for quick, secure, on-the-door code changes in under 30 seconds, eliminating the need to remove the unit from the door. The internal mechanism features a robust stainless steel coding chamber and a free-rotating lever handle that only engages once the correct code is entered.

Please note, this specific variation does not include a latch. It is designed to work with an existing pre-fitted setup or as a direct replacement keypad, sharing a footprint with other popular heavy-duty locks like the Unican 1000 and 5000 to make upgrading simple.

Technical Specifications

- **Finish:** Black Marine Grade Pro 2 (MG Pro 2)
- **Code Change Method:** Easicode Pro (on-the-door code change)
- **Latch:** None supplied (designed for pre-fitted setups or as a replacement keypad)
- **Spindle Size:** 8mm square spindle
- **Door Compatibility:** Suitable for internal and external wooden, composite, and steel doors
- **Coding Chamber:** Stainless steel internal components
- **Footprint Compatibility:** Shares footprint with Unican 1000 & 5000 series

Key Features

- **Marine Grade Protection:** Black MG Pro 2 finish is salt-spray tested for over 1,000 hours for superior corrosion and UV resistance.
- **Easicode Pro Function:** Allows quick and easy code changes from the front of the door without removing the lock.

- **Heavy-Duty Build:** Engineered with stainless steel coding components for maximum durability in high-traffic areas.
- **Free-Rotating Lever:** Lever handle rotates freely to prevent damage from forced entry attempts, only engaging when the correct code is entered.
- **Easy Retrofitting:** Shares a footprint with popular heavy-duty locks, making it an ideal replacement keypad.
- **Free Passage Mode:** Optional free passage function operated from the internal handle for unrestricted access when required.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
