Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg Locks BL7003 Marine Grade Pro with Easicode Function is a heavy-duty mechanical digital lock designed for high-traffic areas and demanding external environments. Featuring the robust Black MG Pro 2 finish, this unit has been salt spray tested for over 1,000 hours and offers enhanced UV protection, making it exceptionally resilient against coastal conditions and extreme weather.

Equipped with Borg's patented Easicode Pro (ECP) technology, the lock allows for quick, on-the-door code changes in seconds without the need to remove the unit or handle loose tumblers. The internal coding components are manufactured from high-grade stainless steel to ensure long-term reliability.

This model features a 60x72mm euro profile lockcase with an optional slot for a standard euro cylinder (sold separately) to enable key override and deadbolting. For added security and durability, it includes a free-rotating, vandal-resistant clutch lever handle that only engages once the correct code is entered. It is designed to share a footprint with other popular heavy-duty locks on the market, such as the Unican 1000 and 5000, making it an ideal retrofit solution.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Series:** BL7000 ECP
- **Finish:** Black MG Pro 2 (Marine Grade)
- **Lockcase:** 60x72mm Euro profile mortice lockcase
- **Backset:** 60mm
- **Spindle:** 8mm
- **Door Suitability:** Timber, composite, and steel doors
- **Usage:** Heavy-duty, internal and external use

Key Features

- **Marine Grade Protection:** Black MG Pro 2 finish is salt spray tested to over 1,000 hours with enhanced UV resistance.

- **Easicode Pro (ECP) System:** Allows quick and easy code changes on the door in seconds.
- **Stainless Steel Internals:** High-grade stainless steel coding chamber components ensure long-lasting external operation.
- **Vandal-Resistant Handle:** Free-rotating clutch lever handle prevents damage from forced entry attempts.
- **Optional Key Override:** Lockcase includes a slot for a standard euro key cylinder to allow deadbolting.
- **Easy Retrofitting:** Shares a footprint with Unican 1000 & 5000 series locks for straightforward replacement.
- **Free Passage Mode:** Allows unrestricted access when code-free entry is required.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
