Brand	Briton
Product type	Accessory

Product Description

The Briton 378 Series Metal Door Strike (378MDS/SE) is a high-quality accessory designed specifically for use with Briton 378 Series panic hardware and 1438 rim devices. This solid metal strike is ideal for installations on single-leaf metal doors and frames, as well as double-rebated metal door applications where a rim panic latch is fitted to the first opening leaf.

Constructed from robust metal with a durable grey finish, this strike is built to withstand the demands of busy commercial and public environments. It features integrated screw slots that allow for quick and easy adjustment during installation, ensuring a precise fit and smooth latching action.

Whether you are completing a new installation or replacing an existing component, this genuine Briton accessory ensures your exit hardware continues to operate reliably and safely.

Technical Specifications

- **Brand:** Briton
- **Manufacturer Reference:** 378MDS/SE
- **Finish:** Grey
- **Compatibility:** Briton 378 Series and 1438 rim devices

- **Application:** Single-leaf metal doors/frames and double-rebated metal door applications
- **Weight:** 100g
- **Pack Quantity:** 1

Key Features

Brand Profile

Briton

The logo for Briton, featuring the word "Briton" in a large, bold, dark blue sans-serif font.

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: [sources discussing Briton's classic door closer lineage note early Briton closers being manufactured by William Newman & Sons Ltd in Birmingham in the 1930s, and that the traditional style still shows up in places like historic properties.](#)
