Specification Summary

Brand	Briton
Product type	Accessory

Product Description

The Briton 570 Series Alarm Switch Kit (manufacturer reference 576.AK) is a dedicated accessory designed to integrate standard Briton 570 Series panic hardware with electronic building systems. By mounting the switch directly into the end box of the panic operator, it enables seamless connection to external audio or visual alarms and door control systems.

When the panic exit device is operated, the switch is activated to provide an immediate notification alert. This ensures that building managers or security personnel are instantly notified whenever an emergency exit door is used, helping to maintain building security and monitor emergency egress. Specifically designed to suit the Briton 570 Series touch bar panic hardware, this kit is an essential addition for commercial, educational, or public buildings requiring enhanced monitoring of emergency exits.

Technical Specifications

- **Brand:** Briton
- **Manufacturer Reference:** 576.AK
- **Part Number:** L31141
- **Finish:** Black
- **Compatibility:** Briton 570 Series panic hardware (such as the Briton 571 touch bar)
- **Mounting Position:** Fits inside the end box of the panic operator
- **Pack Quantity:** 1
- **Weight:** 200g

Key Features

- **Immediate Notification:** Triggers an alert as soon as the panic hardware is operated
- **System Integration:** Allows connection to external audio/visual alarms or door control systems
- **Discreet Installation:** Mounts inside the end box of the panic operator for a clean, tamper-resistant finish
- **Enhanced Security:** Helps monitor unauthorised use of emergency exit doors

Brand Profile

Briton

The logo for Briton, featuring the word "Briton" in a large, bold, dark blue sans-serif font, centered within a light blue rectangular background.

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: [sources discussing Briton's classic door closer lineage note early Briton closers being manufactured by William Newman & Sons Ltd in Birmingham in the 1930s, and that the traditional style still shows up in places like historic properties.](#)
