Product Description

Get high-quality, professional key cutting for your CISA Astral and Astral S cylinders. At Lock & Key Centre, our keys are cut by Registered Master Locksmiths using only genuine CISA key blanks to ensure a perfect fit and smooth operation every time.

CISA Astral and Astral S euro cylinder locks are highly popular security solutions, commonly found on uPVC and double-glazed doors. To order a replacement or spare key, simply locate your unique CISA key code. This code can be found on the plastic security card supplied with your original lock, or engraved directly onto the head of your existing key.

Important Ordering Information:

- **Master Key Systems:** If your key code contains the letters 'MK' or 'SMK' grouped together, this indicates the key is part of a restricted Master Key System. We are unable to cut these keys unless we originally supplied the locking system.
- **Delivery Security:** For your peace of mind, we highly recommend shipping your newly cut keys to an alternative address, such as your workplace or a trusted friend or family member. To maximise security, all keys are dispatched in secure packaging with no customer details or address information included inside the parcel.

Technical Specifications

- **Key Blank:** Genuine CISA blanks
- **Compatible Locks:** CISA Astral and CISA Astral S euro cylinders
- **Code Location:** Found on the original plastic code card or engraved on the head of the key
- **Code Format:** Typically starts with a letter, followed by 5 digits, and ends with 'AE' (e.g., D12165AE)
- **Exclusions:** Cannot cut codes containing 'MK' or 'SMK' (Master Key Systems) unless originally supplied by us

Key Features

- **Genuine Blanks:** Cut using official CISA key blanks for maximum durability and precise operation
- **Master Locksmith Precision:** Professionally cut by Registered Master Locksmiths using state-of-the-art machinery
- **Enhanced Security Dispatch:** Shipped with no invoice or address details inside the package to prevent interception risk
- **Convenient Ordering:** Simply enter your key code online to order additional keys without needing to send your original
- **Ideal for uPVC Doors:** Perfect replacement keys for common double-glazed and uPVC door locks

Brand Profile

Cisa

CISA (Costruzioni Italiane Serrature e Affini) is an iconic **Italian lock and access-control brand**, founded in **1926** by **Luigi Bucci**. It built its reputation early by **patenting the first electrically controlled lock** the same year it was founded—basically kicking the door open (politely, with a latch) on modern electromechanical access control.

Today CISA positions itself as “**CISA Italy**,” with **design and engineering made in Italy**, and a product ecosystem that spans both **mechanical and electronic security** for **residential, public, and commercial buildings**.

Ownership / group: CISA is a **strategic brand of Allegion** and has been part of the Allegion group **since 2013** (around the time Allegion became a standalone listed company).

What they’re known for (in the real world, on real doors):

- **Mechanical locks and cylinders**, including solutions for master keying systems (CISA talks a lot about cylinders/keys and master-key systems production).
- **Electric / electromechanical locks** (heritage category for them), including locks designed to pair with **panic hardware** or remote electric opening in access-control setups.
- **Exit / panic devices** (their ranges are explicitly positioned around installability and reliability, and they’re tracking new EU regulatory changes in their comms).
