Product Description

The CISA C2000 Small Oval Key & Turn Cylinder is a reliable 5-pin cylinder designed for narrow-profile doors, patio doors, and metal gates. It offers key access from the outside and a convenient thumbturn on the inside for quick, keyless locking and operation.

This small oval cylinder is an ideal replacement for existing locks and is compatible with small oval cylinder mortice locks, such as the CISA 44210. It features built-in drill resistance via a hardened steel pin and provides 30,000 key differs for dependable security.

This product is available in multiple finishes, including Polished Brass and Nickel Plated, with weights of 170g or 180g and corresponding barcodes. Please choose your preferred finish and options from the selections below.

Technical Specifications

- **Brand:** CISA
- **Cylinder Profile:** Small Oval (22.5/10/T22.5 with cam, 27.5/T27.5 overall)
- **Overall Length:** 55mm
- **Mechanism:** 5 Pin
- **Keying:** Keyed to Differ (3 keys supplied)
- **Standards:** BS EN 1303:2005
- **Fire Tested:** Grade A
- **Security Features:** Drill resistant (hardened steel pin), 30,000 differs
- **Finishes:** Nickel Plated or Polished Brass (choose below)
- **Weight:** 170g - 180g (depending on finish)

Key Features

- **Convenient Operation:** Key entry on the outside with a thumbturn on the inside for easy locking and unlocking.
- **Versatile Fit:** Ideal for narrow-profile doors, patio doors, and small oval mortice locks like the CISA 44210.
- **Drill Protection:** Hardened steel pin offers robust resistance against drilling attacks.
- **Multiple Finishes:** Available in Polished Brass and Nickel Plated finishes to match your door hardware - please select below.
- **Ready to Install:** Supplied complete with 3 keys and a cylinder retaining screw.

Brand Profile

Cisa

CISA (Costruzioni Italiane Serrature e Affini) is an iconic **Italian lock and access-control brand**, founded in **1926** by **Luigi Bucci**. It built its reputation early by **patenting the first electrically controlled lock** the same year it was founded—basically kicking the door open (politely, with a latch) on modern electromechanical access control.

Today CISA positions itself as “**CISA Italy**,” with **design and engineering made in Italy**, and a product ecosystem that spans both **mechanical and electronic security** for **residential, public, and commercial buildings**.

Ownership / group: CISA is a **strategic brand of Allegion** and has been part of the Allegion group **since 2013** (around the time Allegion became a standalone listed company).

What they're known for (in the real world, on real doors):

- **Mechanical locks and cylinders**, including solutions for master keying systems (CISA talks a lot about cylinders/keys and master-key systems production).
- **Electric / electromechanical locks** (heritage category for them), including locks designed to pair with **panic hardware** or remote electric opening in access-control setups.
- **Exit / panic devices** (their ranges are explicitly positioned around installability and reliability, and they're tracking new EU regulatory changes in their comms).
