Specification Summary

Brand Codelocks

Product type CL200 Series

Product Description

The Codelocks CL255 is a light-duty mechanical digital lock from the CL200 series, featuring a spring-loaded mortice latch with a dual backplate. Ideal for low-traffic environments such as offices, schools, and domestic properties, it provides reliable access control without the need for batteries or wiring.

The lock features a deadlocking plunger to prevent unlawful shimming of the latch. It also includes a slide button that can be used to hold open the latchbolt for free entry when required. This holdback function can be disabled during installation if continuous code-only access is preferred.

This versatile digital lock is available in multiple finishes, including Polished Brass and Stainless Steel, and can be ordered with or without fire testing. Fire-tested models are certified to BS EN 1634-1 and come complete with an optional fire holdback kit. Please select your preferred finish, fire-testing option, and specification from the options below.

Technical Specifications

- **Brand:** Codelocks
- **Series:** CL200 Series
- **Backset:** 60mm
- **Door Thickness:** 35mm to 65mm
- **Case Depth Required:** 85mm
- **Code Length:** 4 to 6 digits
- **Combinations:** 1,000+
- **Buttons:** 14
- **Operation Outside:** Thumbturn on entry of code
- **Operation Inside:** Lever handle free exit
- **Handing:** Reversible (suitable for left or right-hand hung doors)
- **Standards:** BS EN 1634-1 (on fire-tested variants)
- **Finish:** Available in Polished Brass or Stainless Steel (please select from the options below)
- **Fire Tested:** Available as fire-tested or non-fire-tested (please select from the options below)
- **Weight:** 1.144kg to 1.2kg (please select from the options below)

Key Features

- **Holdback Function:** Slide button allows the latch to be held open for free passage (can be disabled on installation).
- **Anti-Shim Protection:** Deadlocking plunger feature prevents unlawful shimming of the latch bolt.
- **Weather Resistant:** Durable PVD finish provides excellent weather resistance.
- **Protective Clutch:** Built-in clutch mechanism protects the lock from damage through forced entry.
- **No Batteries Required:** Fully mechanical operation ensures low maintenance and continuous reliability.
- **Fire Rated Options:** Certified to BS EN 1634-1 when purchased with the fire-tested option (must be fitted with the appropriate intumescent pack).

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that’s built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks’ system for generating **time-sensitive access codes** (think “this code works from 2pm–6pm on Tuesday” rather than “this code works until the heat death of the universe”). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the “serious door” end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the “commercial door that gets slammed 400 times a day” vibe.
