Brand Codelocks

Product type Codelocks

Product Description

The Codelocks KL1000 Horizontal Battery Operated Digital Cabinet Lock is an ideal, quick-retrofit solution for standard keyed cam locks on a wide range of lockers, cabinets, and cupboards. It can also be easily installed on units without existing locks, providing immediate, keyless keypad access.

This horizontal digital lock is a handed product, available in both Left Hand and Right Hand configurations. Please select your required handing option from the choices below.

For environments requiring enhanced hygiene, Clean by Codelocks is an optional photocatalytic finish available to special order. This ISO-certified clear coating reduces bacterial growth by up to 99.96% and offers additional protection against viruses, germs, and environmental toxins.

Technical Specifications

- **Brand:** Codelocks
- **Mechanism:** Electronic Digital
- **Power Supply:** 2 x AAA batteries
- **Battery Life:** Up to 15,000 operations
- **Door Thickness:** Up to 25mm
- **Required Case Depth:** 60mm
- **Dimensions:** 33mm (H) x 136mm (W) x 28mm (D)
- **Code Length:** 4 digits

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that’s built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks’ system for generating **time-sensitive access codes** (think “this code works from 2pm–6pm on Tuesday” rather than “this code works until the heat death of the universe”). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the “serious door” end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the “commercial door that gets slammed 400 times a day” vibe.
