Specification Summary

Brand	Crompton
Product type	Padbolt

Product Description

The Crompton 004A Galvanised Oval Padbolt is a reliable and practical physical security solution, ideal for securing garden gates, sheds, outbuildings, and utility doors. Its robust design features a smooth-sliding oval bolt that can be locked in both the open and closed positions when paired with a suitable padlock. This versatile feature is particularly useful for holding gates or doors open safely during use, preventing them from blowing shut.

Crafted for outdoor durability, this padbolt features a high-quality galvanised finish that provides excellent protection against corrosion, rust, and harsh weather conditions. The backplate and bolt are specially formed to allow for easy installation on both left and right-handed configurations, making it a highly adaptable choice for timber or metal surfaces. Simple to install and built to last, the Crompton 004A offers straightforward, cost-effective security for a wide range of domestic and agricultural applications.

Technical Specifications

- **Brand:** Crompton
- **Manufacturer Reference:** 004A
- **Finish:** Galvanised
- **Length:** 114mm (11.4cm)

- **Weight:** 250g
- **Pack Quantity:** 1

Brand Profile

Crompton

Crompton is a UK **architectural ironmongery** brand used for the practical, “fit-and-forget” hardware that lives on doors, gates, garages and windows—hinges, bolts, latches, padbolts, hasps & staples, and the assorted steel bits that quietly keep properties together.

Today, Crompton sits within the **ERA brand family** (ERA explicitly lists Crompton as one of its recognised brands), and the Crompton range is marketed through ERA's trade channels as their dedicated **ironmongery line**.

In ERA's own wording, the **Crompton range** covers “everything from **gate ironmongery** like **hinges, bolts and latches** to **window and garage door ironmongery**,” and it's positioned as traditional, broadly compatible hardware suitable for **period and contemporary homes**, conversions, and commercial properties—backed by ERA's product/quality know-how.
