Product Description

The **dormakaba BTS75V Single Action Floor Door Closer Kit** (part number L11541) is a high-quality fitting kit designed specifically to suit the dormakaba (formerly Dorma) BTS75V single-action floor closer. This kit provides the essential mechanical connection between your floor-mounted closer and the door leaf, ensuring smooth, reliable, and secure operation.

Engineered for versatility, this accessory kit is fully reversible, making it suitable for both left-hand and right-hand single-action timber doors. The kit includes the necessary arms, pivots, and a sleek cover plate finished in Satin

Stainless Steel, offering a clean, modern aesthetic that blends seamlessly with contemporary interiors.

When installed in conjunction with the BTS75V floor spring, this setup supports doors up to 1100mm wide and weighing up to 120kg. It is also Certifire approved and fire-tested, providing up to 1 hour of protection on timber doors and up to 4 hours on metal doors (when fitted with the appropriate intumescent pack).

Please note: This is a fitting kit containing the arms and cover plate only. The floor spring mechanism itself is not included and must be purchased separately.

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
