Specification Summary

Brand	dormakaba
Product type	L1000 Series

Product Description

The dormakaba Simplex L1031 (formerly Kaba) is a heavy-duty, fully mechanical digital lock designed to provide reliable keyless access control without the need for batteries or wiring. Featuring a robust lever-operated design, this weather-resistant lock is ideal for high-traffic commercial and residential environments.

A key feature of the L1031 model is its integrated passage set mode. Activated via an internal thumbturn or key, this function allows free access without entering a code - perfect for periods of high-frequency use, such as deliveries or unloading.

The lock supports a single, easily managed access code of 1 to 5 digits, offering over 1,000 possible combinations. Code changes can be completed quickly by authorised personnel while the unit remains fitted to the door. To prevent damage from forced entry attempts, the lock incorporates a protective clutch mechanism.

This model is available in multiple finishes, including Satin Chrome and Polished Brass, and in both Left Hand and Right Hand configurations. Weights range from 4.33kg to 4.868kg depending on your selection. Please choose your preferred finish, handing, and other options from the selection below.

Technical Specifications

- **Brand:** dormakaba
- **Series:** Simplex L1000 (L1031)
- **Backset:** 70mm
- **Case Depth Required:** 110mm
- **Door Thickness:** 35mm to 57mm

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
