**Product Description**

Our professional Eurospec MP10 key cutting service allows you to order high-quality replacement or spare keys cut precisely to your unique code. Eurospec cylinders are widely used across both commercial and residential properties, and these high-security dimple keys must be cut using their specific code.

To order, please locate the code stamped on the head of your original key. The code must begin with **BG**, **BGMK1**, or **BGMK2**, followed by numbers between 00000 and 09999.

**Important Ordering Information:**

- **BG10 Codes:** If your key code starts with "BG10", we cannot cut your key unless your original supplier is no longer available. Please contact us before placing your order.
- **No Code:** If your key does not feature one of the valid codes listed above, please do not order, as we are unable to cut them.
- **Delivery Security:** As Master Locksmiths, we strongly recommend having your keys delivered to a different address than where the lock is installed (such as a workplace, friend, or family member). For your peace of mind and enhanced security, all keys are shipped without any customer details or address information inside the package.

## Technical Specifications

- **Manufacturer:** Eurospec
- **Key Type:** Dimple key
- **Compatible Code Series:** BG, BGMK1, or BGMK2 followed by numbers between 00000 to 09999 (excluding BG10 codes unless pre-arranged)
- **Cutting Method:** Cut to code

## Key Features

- **Precision Cut:** Expertly cut to code for smooth and reliable operation.
- **Enhanced Security Shipping:** Dispatched without any internal customer details or address information inside the package for maximum security.
- **Convenient Spares:** Ideal for replacing lost keys or creating spares for family members, tenants, or employees.
- **Wide Application:** Suitable for Eurospec MP10 cylinders commonly found in residential and commercial doors.

## Brand Profile

Eurospec

**Eurospec** is the **commercial / project-grade architectural hardware** brand within **Carlisle Brass**, aimed at environments where **testing, compliance, and durability** matter more than vibes. In practice, Eurospec is the “spec it for schools/hospitals/offices and stop thinking about it” range: stainless steel levers, hinges, locks/latches, cylinders, panic/emergency exit hardware, and the rest of the door set ecosystem.

What Eurospec is known for is being **standards-led**. Product lines are commonly marketed with **CE marking, fire door suitability (e.g., FD30/FD60 where applicable)** and testing to relevant European standards like **BS EN 1935** for hinges (you’ll see Grade 13/7 etc. in listings, with stated door weight ratings).

Range-wise, Eurospec is deliberately broad, covering:

- **Hinges** (including ball-bearing and fire-rated variants)
- **Locks, latches, deadlocks**
- **Door furniture** (lever handles on rose/backplate, pull handles)
- **Window hardware and other commercial ironmongery staples**
