Specification Summary

Brand	Evva
Product type	Rim Cylinders

Product Description

The EVVA A5 AZG Rim Cylinder is a robust, solid-construction UK standard rim cylinder designed for reliable security. Built around the dependable EVVA A5 5-pin locking system, this cylinder is stocked Keyed Alike (KA) to pass key A67670, making it ideal for installations requiring multiple locks to operate with the same key.

Each cylinder is supplied complete with a solid machined rose and two connecting screws for a secure, straightforward installation. It features an unrestricted key profile with an 'A' section (with 'F' section available to special order) and includes three keys as standard. This cylinder also offers 30-minute fire resistance up to 821°C, providing essential peace of mind.

This rim cylinder is available in multiple finishes, including Polished Brass and Nickel Plated. Please choose your preferred finish from the options below.

Technical Specifications

- **Cylinder Type:** Rim Cylinder
- **Cylinder System:** EVVA A5
- **Mechanism:** 5-Pin
- **Keying:** Keyed Alike (to pass key A67670)
- **Keys Supplied:** 3
- **Fire Tested:** 30-minute fire resistance to 821°C (Grade 0)
- **Finishes Available:** Polished Brass, Nickel Plated (please select below)
- **Key Profile:** Unrestricted 'A' section ('F' section to special order)

Key Features

- **Keyed Alike Convenience:** Stocked to pass key A67670, allowing multiple cylinders to be operated by a single key.
- **Solid Construction:** Supplied complete with a solid machined rose and two connecting screws for a robust installation.
- **Fire Resistant:** Tested to withstand temperatures up to 821°C for 30 minutes.
- **Versatile Finishes:** Available in Polished Brass or Nickel Plated to match your existing door hardware.
- **Unrestricted Key Profile:** Standard 'A' section profile allows for easy key duplication when required.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as “start-up energy since 1919” (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
