## Specification Summary

Brand Evva

Product type Key Cap

## Product Description

The EVVA ICS Coloured Key Caps are designed to fit onto the head of EVVA ICS keys, providing a simple yet highly effective way to organise and identify your keys. Constructed from durable materials, these key caps are easy to fit and help you quickly distinguish between different doors or access areas in your home or business.

In addition to making your keys easily identifiable, these caps also enhance grip, making the keys more comfortable to hold and turn. They are available in a wide selection of bright and distinct colours, including Azure, Black, Blue, Dark Green, Grey, Light Green, Orange, Pink, Red, and Yellow. Please choose your preferred colour option from the selection below.

## Technical Specifications

- **Brand:** EVVA
- **Compatibility:** Suitable for EVVA ICS keys
- **Pack Quantity:** 1
- **Weight:** 3g
- **Available Finishes:** Azure, Black, Blue, Dark Green, Grey, Light Green, Orange, Pink, Red, and Yellow (please select from the options below)

## Key Features

- **Easy Identification:** Helps you quickly distinguish between keys with a choice of bright colours
- **Improved Grip:** Enhances the key head surface for a more comfortable and secure hold
- **Durable Construction:** Built to withstand daily wear and tear
- **Simple to Fit:** Easily slips onto the head of your existing EVVA ICS key

## Brand Profile

Evva

**EVVA** is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as “start-up energy since 1919” (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
