**Specification Summary**

Brand	Evva
Product type	Banham Cylinders

**Product Description**

This premium EVVA ICS L111 & S363 Banham cylinder set is designed specifically to suit Banham locks, providing a high-security upgrade or replacement. Supplied as a keyed alike pair, both the L111 and S363 cylinders operate using the same key for ultimate convenience. The set is keyed to differ on a unique key code, ensuring maximum security for your property.

The EVVA ICS (Inner Code System) is a highly durable, patent-protected reversible key system. It features a sophisticated mechanism that offers both legal and technical key protection to prevent unauthorised key copying.

Built to withstand physical attacks, these cylinders are highly wear and drill resistant, meeting the rigorous BS EN 1303:2005 standard.

This set is supplied complete with 6 keys and is finished in high-quality nickel plating to complement modern door hardware.

## Technical Specifications

- **Brand:** Evva
- **Cylinder System:** EVVA ICS
- **Cylinder Type:** Banham (to suit Banham locks)
- **Keying:** Keyed Alike Pair (Keyed to Differ Set)
- **Keys Supplied:** 6
- **Finish:** Nickel Plated
- **Mechanism:** 6 Pin
- **Handing:** Left Hand (L111 cylinder)
- **Standards:** BS EN 1303:2005, BS EN 1634 (Grade B Fire Tested)

## Key Features

- **Keyed Alike Convenience:** S363 and L111 cylinders operate using the same key, reducing key clutter
- **Patented Protection:** EVVA ICS patent-protected reversible key system prevents unauthorised key duplication
- **Robust Security:** Highly wear and drill resistant construction for reliable physical protection
- **Reversible Key Design:** Symmetrical keys can be inserted either way up for ease of use
- **Certified Quality:** Manufactured to BS EN 1303:2005 and fire tested to BS EN 1634 (Grade B)
- **Complete Set:** Supplied with 6 keys

## Brand Profile

Evva

**EVVA** is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as “start-up energy since 1919” (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
