Specification Summary

Brand	Evva
Product type	Rim Cylinders

Product Description

The EVVA ICS SC1 Rim Cylinder is a high-security, patent-protected replacement cylinder specifically designed for Ingersoll SC71 and SC73 rim locks. Utilizing EVVA's advanced ICS (Inner Code System) technology, this cylinder offers robust legal and technical protection against unauthorised key copying.

The durable, reversible key system is designed with maximum keying potential in mind, making it highly suitable for planning future master key system extensions. Supplied keyed to differ on the Aldridge in-house section, this cylinder is wear and drill resistant, ensuring long-lasting security.

This cylinder is available in a choice of finishes, including Nickel Plated, Polished Brass, and Polished Chrome. Please select your preferred finish, manufacturer reference, and barcode from the options below.

Technical Specifications

- **Brand:** EVVA
- **Cylinder System:** EVVA ICS
- **Cylinder Type:** Rim Cylinder (to suit Ingersoll SC71 and SC73 locks)
- **Keying:** Keyed To Differ (on Aldridge in-house section)
- **Keys Supplied:** 3
- **Mechanism:** 10 Pin
- **Standards:** BS EN 1303:2005, BS EN 1634
- **Fire Tested:** Grade B
- **Weight:** 380g
- **Finishes Available:** Nickel Plated, Polished Brass, Polished Chrome (please choose from the options below)

Key Features

- **Ingersoll Compatibility:** Direct replacement cylinder designed specifically to fit Ingersoll SC71 and SC73 rim locks.
- **Patented Protection:** Features a registered and patented reversible key system to prevent unauthorised key duplication.
- **High Durability:** Wear and drill-resistant construction ensures reliable, long-term security.
- **Reversible Key Design:** User-friendly reversible keys provide smooth and convenient operation from either side.
- **Aesthetic Choices:** Available in multiple finishes to seamlessly match your existing door hardware.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as “start-up energy since 1919” (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
