Specification Summary

Brand	Exidor
Product type	Touch Bar

Product Description

The EXIDOR 402 Touch Bar Panic Bolt is a high-specification, surface-mounted emergency exit device designed for single and double door applications. Suitable for both wooden and steel doors, including fire doors, this panic bolt combines smooth operation with robust security.

Featuring a two-point locking system with vertical Pullman latches, the EXIDOR 402 ensures a smooth latching action and reliable security. The patented lip design prevents accidental jamming of the touch bar, ensuring the exit remains clear and operational at all times. It is fully reversible (non-handed) and supplied with timber fittings, making it a versatile choice for a wide range of commercial and public buildings. Finished in a durable silver enamel, it is certified to BS EN 1125 and CE marked for safety.

Technical Specifications

- **Brand:** Exidor
- **Model:** 402
- **Standards:** BS EN 1125, CE Marked
- **Finish:** Silver Enamelled
- **Handing:** Reversible (Non-handed)

- **Maximum Door Width:** 900mm

Brand Profile

Exidor

The logo for Exidor, featuring the word "EXIDOR" in a bold, sans-serif font. A thick horizontal line is positioned above the letters "IDOR", starting from the top of the "X" and extending to the right.

Exidor is a UK panic-and-emergency-exit hardware brand best known for **push bars, push pads, and multi-point exit devices** used on fire exits and escape routes in commercial buildings. It's one of those "you don't notice it until you *really* need it" brands—built around reliable, standards-compliant egress hardware.

Exidor says it has been a leading manufacturer in this category for **around 90 years**, and trade/brand info places its establishment at **1931**.

Standards & compliance are central to the brand's positioning: Exidor panic and emergency exit devices are marketed as **CE marked** and **tested to EN 1125 (panic exit devices)** and **EN 179 (emergency exit devices)**—the core European standards that specifiers and installers care about for public buildings and controlled escape routes.

Ownership / group: Exidor was acquired by **ASSA ABLOY Opening Solutions UK & Ireland in 2018** (widely reported in trade press), and Companies House filings list **Assa Abloy Limited** as the controlling party.

Where it sits today: Exidor is now presented as a **range within the UNION family** (ASSA ABLOY's UK door hardware portfolio), and the brand is used across "real world" commercial projects where you might need bespoke finishes, different keep/bolt options, alarms, or microswitch variants for monitoring.
