Specification Summary

Brand	Exidor
Product type	Outside Access Device

Product Description

The Exidor 710EC Lever Operated Outside Access Device is a high-security, UK-manufactured external access solution designed for use with the Exidor 700 and 7000 series of panic and emergency exit hardware. Supplied complete with a Euro cylinder and three keys, this robust unit offers a secure way to gain entry from the outside of an escape door without compromising emergency egress.

Constructed from high-grade stainless steel, the 710EC is engineered to resist physical force and drill attacks, making it ideal for high-security applications. The lever mechanism is designed to operate smoothly; when unlocked,

the lever engages to retract the internal bolts, and when locked, the lever disengages to rotate freely, preventing damage from forced entry attempts.

This non-handed, fully reversible unit complies with the dimensional requirements of BS 8300 and Approved Document "M" (Equality Act) to support barrier-free access. It features a stylish RAL 7016 Anthracite Grey epoxy powder-coated finish and is surface-mounted with concealed machine screws for a clean, secure installation.

Technical Specifications

- **Brand:** Exidor
- **Manufacturer Reference:** 710EC
- **Mechanism:** Euro Cylinder
- **Keys Supplied:** 3
- **Finish:** Anthracite Grey (RAL 7016)
- **Handing:** Reversible (non-handed)
- **Door Thickness:** 45mm
- **Width:** 88mm

Brand Profile

Exidor

The logo for Exidor, featuring the word "EXIDOR" in a bold, sans-serif font. A thick horizontal line is positioned above the letters "IDOR", starting from the top of the "X" and extending to the right.

Exidor is a UK panic-and-emergency-exit hardware brand best known for **push bars, push pads, and multi-point exit devices** used on fire exits and escape routes in commercial buildings. It's one of those "you don't notice it until you *really* need it" brands—built around reliable, standards-compliant egress hardware.

Exidor says it has been a leading manufacturer in this category for **around 90 years**, and trade/brand info places its establishment at **1931**.

Standards & compliance are central to the brand's positioning: Exidor panic and emergency exit devices are marketed as **CE marked** and **tested to EN 1125 (panic exit devices)** and **EN 179 (emergency exit devices)**—the core European standards that specifiers and installers care about for public buildings and controlled escape routes.

Ownership / group: Exidor was acquired by **ASSA ABLOY Opening Solutions UK & Ireland in 2018** (widely reported in trade press), and Companies House filings list **Assa Abloy Limited** as the controlling party.

Where it sits today: Exidor is now presented as a **range within the UNION family** (ASSA ABLOY's UK door hardware portfolio), and the brand is used across "real world" commercial projects where you might need bespoke finishes, different keep/bolt options, alarms, or microswitch variants for monitoring.
