Specification Summary

Brand	Gatemaster
Product type	Gatemaster

Product Description

The Gatemaster DGLS Single Sided Handed Digital Gate Lock is a robust, highly durable security solution designed specifically for outdoor gates. Built to withstand the elements, this lock is weather-resistant and salt spray tested to marine grade, ensuring long-lasting performance in harsh outdoor environments.

Operating entirely mechanically, it requires no keys, power, or batteries. The lock features a secure 10-button keypad on the outside for code-controlled entry, and a free-exit thumbturn on the inside for convenient egress. It also features an auto-latching mechanism that automatically secures the gate when closed, alongside a deadlocking function. A brass bearing plate is supplied to support the latchbolt, reducing wear and extending the lifespan of the lock.

This digital gate lock is available in multiple configurations to suit your specific installation needs. It is offered in both **Left Hand** and **Right Hand** orientations, and in two sizes to accommodate different gate frame thicknesses: **10mm to 30mm** (DGLS01) or **40mm to 60mm** (DGLS02). Please choose your required handing and gate frame size from the options below to ensure the correct fit.

Technical Specifications

- **Brand:** Gatemaster
- **Mechanism:** Mechanical Digital
- **Code Length:** 3 to 5 digits
- **Combinations:** 500+
- **Keypad Buttons:** 10
- **Bolt Throw:** 20mm
- **Case Width:** 30mm
- **Lock Width:** 98mm
- **Finish:** Black
- **Gate Frame Thickness:** Options to suit 10mm to 30mm, or 40mm to 60mm (please select below)
- **Handing:** Left Hand or Right Hand options available (please select below)
- **Operation Outside:** Thumbturn on entry of correct code
- **Operation Inside:** Thumbturn free exit
- **Pack Quantity:** 1
- **Weight:** 1.82kg

Key Features

- **Marine Grade Durability:** Weather-resistant and salt spray tested to marine grade for reliable outdoor use.
- **Keyless Convenience:** Secure mechanical digital keypad entry with no keys or power supply required.
- **Auto-Latching & Deadlocking:** Automatically latches when the gate is closed, with an integrated deadlocking function for enhanced security.
- **Brass Bearing Plate:** Supplied with a brass bearing plate designed to support the latchbolt and reduce wear.
- **Easy Installation:** Designed to be bolted securely in place on metal gate frames.
- **Versatile Options:** Available in left or right-handed configurations to suit different gate frame thicknesses (please select below).

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into “bolt-on simplicity”: many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
