## Specification Summary

Brand Gatemaster

Product type Gate Closer

## Product Description

The Gatemaster Surface Mounted Gate Closer is a reliable and robust solution designed for gates weighing up to 50kg and with a maximum width of 1000mm. It features two variable speeds, allowing you to independently adjust both the closing and latching actions to ensure smooth and secure gate closure. For added convenience, it can also hold the gate open at a 90° angle.

This versatile closer is available in two distinct configurations to suit your specific installation requirements. The standard SMC model is supplied without a sliding rail. However, if the pivot point on your gate does not line up with the pivot point on the closer, the SMR model is available complete with a sliding rail to resolve this offset.

Please select your preferred option from the choices below, with variations available in manufacturer reference (SMC or SMR), weight (1.05kg or 1.4kg), and whether the unit is supplied with or without a sliding rail.

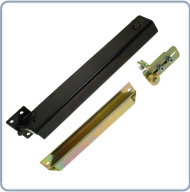

## Technical Specifications

- **Brand:** Gatemaster
- **Finish:** Black
- **Length:** 32cm
- **Projection:** 61mm
- **Maximum Gate Weight:** 50kg
- **Maximum Gate Width:** 1000mm
- **Maximum Opening Angle:** 90°
- **Hold Open:** Yes (at 90°)
- **Manufacturer Reference:** SMC or SMR (please choose from the options below)
- **Sliding Rail:** Available with or without sliding rail (please choose from the options below)
- **Weight:** 1.05kg or 1.4kg (please choose from the options below)
- **Barcode:** 5056240128696 or 5060910281444 (please choose from the options below)

## Key Features

- **Variable Speeds:** Two adjustable speeds for controlled closing and latching.
- **Hold-Open Function:** Conveniently holds the gate open at a 90° angle when required.
- **Versatile Installation:** Available with a sliding rail (SMR) to accommodate offset gate pivot points.
- **Surface Mounted:** Easy to install directly onto the gate surface.
- **Robust Construction:** Designed for reliable performance on gates up to 50kg.

## Brand Profile

Gatemaster

**Gatemaster** is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle, mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
