Specification Summary

Brand	Geze
Product type	Overhead

Product Description

The GEZE TS2000NV is a versatile, medium-duty overhead door closer designed for single-leaf internal doors up to 1100mm wide. Fully reversible, it is suitable for both left and right-mounted doors without the need for conversion, and is approved for use on timber fire and smoke protection doors.

This overhead closer features an adjustable closing force of EN size 2 to 4, which can be easily adjusted from the side. It also offers fully adjustable closing speed and latching action from the front, providing precise control over the door's closing cycle.

Depending on your requirements, this door closer is available with or without a hydraulic backcheck function, and comes in a choice of high-quality finishes including Polished Brass, Satin Stainless Steel, and Silver. Please select your preferred finish, backcheck option, and weight from the options below.

Technical Specifications

- **Power Size:** EN 2 to 4
- **Maximum Door Width:** 1100mm
- **Handing:** Reversible (suitable for left and right-handed doors)
- **Adjustable Closing Speed:** Yes
- **Adjustable Latch Action:** Yes
- **Backcheck:** Available with or without backcheck (please select from the options below)

Brand Profile

Geze

GEZE is a German, **family-owned** global manufacturer of **door, window, and safety technology**, best known in the trade for **door closers, automatic door systems** (sliding/swing/revolving), **window drives**, and **smoke & heat extraction (SHEV)** solutions used in modern building safety and automation.

Founded in **1863**, GEZE remains independently owned and headquartered in **Leonberg**, near Stuttgart - one of the reasons it's often described as a "proper engineering company" rather than a brand label slapped on a catalogue.

In practical terms, GEZE lives in the space where **comfort meets compliance**:

- **Door closing**: from standard overhead closers to integrated systems for higher-spec doors and fire/smoke applications.
- **Automatic entrances**: operators for swing and sliding doors used in public buildings, retail, airports, offices—accessibility and flow without sacrificing safety.
- **Safety + building automation**: electrically operated window systems for **natural ventilation** and for **smoke and heat extraction** in a fire, plus increasing emphasis on digital networking of doors/windows in "smart building" setups.

Scale-wise, GEZE states it has **3,000+ employees worldwide, 37 subsidiaries**, and reported **€507m+ turnover (FY 2022/23)** - big enough to be everywhere, still small enough to feel focused.
