## Brand Profile

GU

**GU** (short for **Gretsch-Unitas**) is a German, family-run **window and door technology** group best known in the trade for **multipoint locking, door & window hardware, and automatic entrance systems**. The company's headquarters are in **Ditzingen, Germany**, and it positions itself around integrated "systems" for windows, doors and façades rather than single standalone products.

The GU Group manufactures and sells across several well-known brands, most notably:

- **GU** – architectural hardware and systems for windows/doors/façades
- **BKS** – locking technology (cylinders, locks, locking systems)
- **FERCO** – hardware, especially prominent in the window/door fabrication world

In many markets (including the UK), GU is a staple name for **uPVC/aluminium door locks and window hardware**, plus higher-spec commercial solutions like **escape route hardware** and **mechatronic locking**, depending on the sub-brand and product line.

History-wise, multiple sources place GU's origins in **1907** in the Stuttgart area, and the company has since grown into a global group with many production/sales companies across dozens of countries.
