Specification Summary

Brand	Hooply
Product type	Container

Product Description

The Hooply Flush Bolt is a robust finger bolt specifically designed for securing container window shutters. It provides a reliable and sturdy locking mechanism to keep your container shutters firmly closed, ensuring enhanced security and protection.

Featuring a clean silver finish, this flush bolt integrates seamlessly with standard container hardware. It is supplied as a single unit in boxed packaging, making it an ideal choice for both new installations and quick replacements of worn parts.

Please note that rubber grommets are not included with this finger bolt and must be purchased separately if required for your specific installation.

Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** SHUTTER-FLUSHBOLT
- **Finish:** Silver
- **Overall Length:** 22.7cm
- **Faceplate Length:** 142mm

- **Bolt Length:** 110mm
- **Weight:** 350g
- **Pack Quantity:** 1
- **Barcode:** 5056240113852

Key Features

- **Tailored Fit:** Specifically designed to suit container window shutters.
- **Corrosion-Resistant Finish:** Durable silver finish that blends with container aesthetics.

Brand Profile

Hooply

The logo for Hooply, featuring the word "Hooply" in a bold, black, sans-serif font. The letter 'H' is significantly larger than the other letters, making it a prominent feature of the brand identity.

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint “gearbox” setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as “key operated latch + multiple deadbolts”).
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It’s become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It’s very “trade reality”-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
