Specification Summary

Brand	ILS
Product type	Bullet Locks

Product Description

The ILS FDM004 Round Cylinder Bullet Lock is a robust security solution designed specifically for securing roller shutters and industrial doors. Featuring a 25mm round head, this high-quality lock operates via an integrated split pin mechanism located behind the cylinder barrel. Turning the key rotates the split pin, allowing the bullet to be easily inserted into or withdrawn from its housing for reliable, heavy-duty protection.

This lock is supplied keyed alike as standard, making it ideal for premises requiring multiple locks operated by a single key. For added security, the key is only removable when the lock is in the fully locked position, ensuring the shutter cannot be left accidentally unsecured.

Technical Specifications

- Brand: ILS
- Manufacturer Reference: FDM.004-B KA
- Cylinder Diameter: 25mm
- Cylinder Finish: Chrome Plated
- Total Length: 83mm
- Pin Length: 53mm

- Keying: Keyed Alike
- Keys Supplied: 2
- Weight: 150g
- Packaging: Bagged
- Barcode: 5055120618357

Key Features

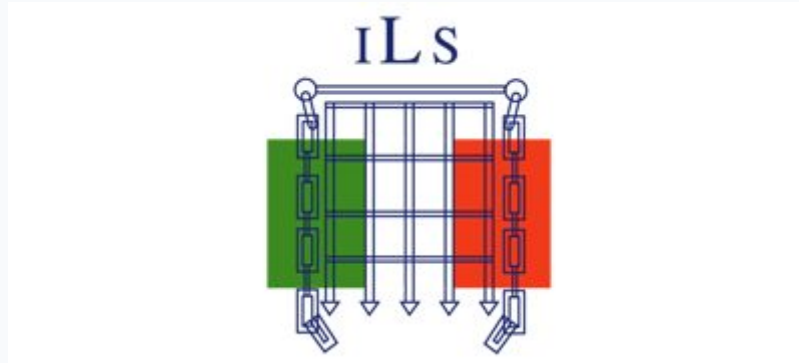

- Designed to secure commercial roller shutters and industrial doors
- Integrated split pin mechanism rotates to lock securely into the housing
- Key is removable in the locked position only to prevent the door being left unsecured
- Supplied keyed alike for convenient multi-lock operation
- Durable chrome-plated finish
- Supplied complete with 2 keys

Brand Profile

ILS

ILS (Italian Locking Systems) is a UK trade security brand best known for **heavy-duty locking products** aimed at two very specific, very real-world sectors: the **roller shutter trade** and the **container hire / site security** world. In other words: if it's metal, outdoors, and someone's trying to defeat it with an angle grinder and bad intentions, ILS is probably in the conversation.

ILS **started trading in 1987**, initially selling roller shutter locks, padlocks and shutter components, and later became affiliated members of the **British Blind and Shutter Association (BBSA)**.

What they're known for

ILS built its name on **roller shutter locking** and the hardware that goes with it:

- **Bullet locks** for roller shutters (common models like the **FDM007-1** round-face style), typically sold with features like **5-pin locking** and key removal only in the locked position.
- **Central shutter locks / espagnolette-style locks** (including "Prefer" variants that accept a **Euro cylinder**, useful when you want to standardise keying).
- Trade channels also position ILS as a major stockist/supplier for **container padlocks, bullet locks, guide locks, ground units**, and related site-security components.
