Brand Kickstop

Product type Door Bar

Product Description

The KICKSTOP 9616 20mm London Door Bar is a highly effective, heavy-duty door frame reinforcing bar designed to protect wooden door frames from forced entry. When a door is kicked or forced, traditional wooden frames often split around the lock staple (keep). This solid steel bar is screwed directly onto the internal face of the frame on the lock side, providing robust resistance against kicking, splitting, and forcing.

Featuring a standard 'D' shaped staple, this London Bar is designed to fit over the staple of a surface-mounted rim lock or cylinder nightlatch. It is suitable for standard staple sizes measuring 30mm x 70mm or less. The bar is manufactured from a single, continuous piece of 5mm thick solid steel with rounded edges and countersunk holes, ensuring a neat, flush-fitting finish.

This product is available in multiple finishes, including Brasslux, Dark Brown, and White, to match your existing door hardware. Please select your preferred finish, manufacturer reference, and barcode from the options below.

Technical Specifications

- **Length:** 61cm (610mm)
- **Width:** 20mm
- **Thickness (Depth):** 5mm
- **Staple Dimensions:** 30mm (Width) x 70mm (Length)
- **Finishes:** Brasslux, Dark Brown, or White (please choose from the options below)
- **Manufacturer References:** 9616BLX, 9616BN, or 9616WH (please choose from the options below)
- **Barcodes:** 5056240119915, 5056240119922, or 5056240119939 (please choose from the options below)
- **Fixings:** Supplied with 2.5-inch No.10 hardened steel woodscrews

Key Features

- **Frame Reinforcement:** Protects wooden door frames against kicking, splitting, and forced entry.
- **D-Shaped Staple:** Fits over and secures the staple (keep) of a surface-fitted rim lock or cylinder nightlatch.
- **Solid Steel Construction:** Manufactured from 5mm thick steel with rounded edges and countersunk holes for a flush fit.
- **Supplied with Fixings:** Includes hardened steel woodscrews for immediate installation.
- **Multiple Finishes:** Available in a choice of finishes to suit your door - please select from the options below.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security for timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain's largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it's not "a lock brand," it's "make the door and frame stop behaving like wet cardboard under attack."
