

The Lowe & Fletcher 1334 Nut Fix Camlock is a highly reliable and versatile locking solution designed for a wide range of applications, including cupboards, cabinets, lockers, and medical furniture. Featuring a robust 16mm body length and a distinct 24mm x 24mm square face, this camlock is both practical and aesthetically suited for modern storage units.

Constructed with a durable chrome-plated finish, the lock is designed for a secure Double D hole installation and is held firmly in place with a standard nut fixing. It operates with a 180° anti-clockwise movement and utilizes the popular L&F 92 key series, offering 200 different lock combinations (differs) for enhanced security. Each lock is supplied keyed to differ and comes complete with two keys.

Technical Specifications

Brand Profile

Lowe & Fletcher

Lowe & Fletcher is a long-established British manufacturer of **locking systems for industry**, best known for high-volume, application-specific locks like **camlocks, quarter-turns, compression locks, and electronic/keypad solutions** used on things like **enclosures, cabinets, lockers, post/parcel units, and industrial equipment**. They're a **sixth-generation, family-owned** business with roots going back to **1889**, when **John Lowe and Thomas Fletcher** founded a lockmaking firm in **Willenhall** in the Black Country—one of the historic heartlands of UK lockmaking.

Today, Lowe & Fletcher forms part of the **Lowe & Fletcher Group**, which describes two main divisions: **Locking Systems** (industrial/OEM locks) and **Fire Safety** (smoke and fire containment systems).

Operationally, their Locking Systems division includes UK operations based around the West Midlands (e.g., **Wednesbury, WS10 7DE**) and they state they have multiple operational sites across Europe and the US to serve local and specialist markets.

On the product side, their camlock range alone spans **mini camlocks, standard camlocks, slamlocks, and IP-rated water-resistant variants** (with application-driven options like tool/coin operation and different cam geometries).
