Specification Summary

Brand	Lowe & Fletcher
Product type	Nut Fix

Product Description

The Lowe & Fletcher 1336 Nut Fix Camlock is a highly reliable and versatile locking solution designed for securing cupboards, cabinets, lockers, and metal office furniture. Manufactured by industry specialists Lowe & Fletcher, this robust camlock features a classic round face with a bright chrome finish, making it both functional and visually clean.

This model is supplied keyed to differ, operating on the popular 92 key series with up to 200 unique lock combinations. It comes complete with two keys and a 51mm straight cam. The lock is secured firmly in place using a standard nut fixing, providing a sturdy, twist-resistant installation. With a 180-degree anti-clockwise movement, it offers smooth and dependable operation for everyday use in commercial or residential settings.

Brand Profile

Lowe & Fletcher

Lowe & Fletcher is a long-established British manufacturer of **locking systems for industry**, best known for high-volume, application-specific locks like **camlocks, quarter-turns, compression locks, and electronic/keypad solutions** used on things like **enclosures, cabinets, lockers, post/parcel units, and industrial equipment**. They're a **sixth-generation, family-owned** business with roots going back to **1889**, when **John Lowe and Thomas Fletcher** founded a lockmaking firm in **Willenhall** in the Black Country—one of the historic heartlands of UK lockmaking.

Today, Lowe & Fletcher forms part of the **Lowe & Fletcher Group**, which describes two main divisions: **Locking Systems** (industrial/OEM locks) and **Fire Safety** (smoke and fire containment systems).

Operationally, their Locking Systems division includes UK operations based around the West Midlands (e.g., **Wednesbury, WS10 7DE**) and they state they have multiple operational sites across Europe and the US to serve local and specialist markets.

On the product side, their camlock range alone spans **mini camlocks, standard camlocks, slamlocks, and IP-rated water-resistant variants** (with application-driven options like tool/coin operation and different cam geometries).
