Specification Summary

Brand Lowe & Fletcher

Product type Snap Fix

Product Description

The Lowe & Fletcher 2736 Square Snap Fit Camlock is a reliable and easy-to-install locking solution designed primarily for metal office furniture. It features integrated snap-fit wings that allow for a quick, tool-free push-fit installation into pre-cut panels, making it an ideal replacement or new-fit choice for filing cabinets, cupboards, and multi-locking metal drawers.

Constructed with a durable bright chrome-plated finish, this square-faced camlock offers a clean, professional appearance. It operates with a 180° anti-clockwise movement and is supplied keyed to differ with 2,000 possible key combinations to ensure dependable security. Each lock comes complete with two keys, providing a ready-to-use solution for commercial and home office storage.

Brand Profile

Lowe & Fletcher

Lowe & Fletcher is a long-established British manufacturer of **locking systems for industry**, best known for high-volume, application-specific locks like **camlocks, quarter-turns, compression locks, and electronic/keypad solutions** used on things like **enclosures, cabinets, lockers, post/parcel units, and industrial equipment**. They're a **sixth-generation, family-owned** business with roots going back to **1889**, when **John Lowe and Thomas Fletcher** founded a lockmaking firm in **Willenhall** in the Black Country—one of the historic heartlands of UK lockmaking.

Today, Lowe & Fletcher forms part of the **Lowe & Fletcher Group**, which describes two main divisions: **Locking Systems** (industrial/OEM locks) and **Fire Safety** (smoke and fire containment systems).

Operationally, their Locking Systems division includes UK operations based around the West Midlands (e.g., **Wednesbury, WS10 7DE**) and they state they have multiple operational sites across Europe and the US to serve local and specialist markets.

On the product side, their camlock range alone spans **mini camlocks, standard camlocks, slamlocks, and IP-rated water-resistant variants** (with application-driven options like tool/coin operation and different cam geometries).
