Is Cylinder

Product Description

The Mul-T-Lock MT5 Euro Single Cylinder (Half Euro) offers premium high-security protection for applications where key access is only required from one side, such as garages, key switches, and external gates. Built on Mul-T-Lock's multi-patented MT5 mechanical platform, this cylinder provides exceptional resistance against common forms of forced entry and manipulation.

At the heart of the MT5's security is its multi-layered locking mechanism. It integrates advanced telescopic pin technology with the patented Alpha Spring - a mobile element located at the tip of the key that engages an additional level of security. This combination ensures superior protection against picking, drilling, and bumping. Key control is strictly managed, with duplicate keys only cut upon presentation of the unique coded security card.

These half euro cylinders are available in multiple lengths, finishes, and cam configurations (including Multi-Position options). Please select your required size, finish, and cam type from the options below.

Technical Specifications

- **Cylinder Profile:** Euro profile single (half euro)
- **Technology:** Patented MT5 mechanical platform with telescopic pins and Alpha Spring
- **Lengths Available:** 40.5mm, 44.5mm (please select from the options below)
- **Finishes:** Nickel, Brass (please select from the options below)
- **Cam Options:** Standard, Multi-Position (Multi POS) (please select from the options below)
- **Security Protection:** Anti-drill, anti-pick, and anti-bump resistance
- **Key Control:** Restricted key duplication via coded security card

Key Features

- **Premium Security:** Multi-layered locking mechanism combining telescopic pins and a patented Alpha Spring for maximum protection.
- **Advanced Key Control:** Keys can only be duplicated by authorised dealers upon presentation of the unique security card.
- **Attack Resistant:** Engineered to withstand drilling, picking, and bumping attempts.
- **Versatile Applications:** Ideal for doors, garages, and gates requiring one-sided key access.
- **Multiple Options:** Available in nickel or brass finishes, different lengths, and standard or multi-position cams to suit your installation.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders, patented key systems, and mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
