Specification Summary

Brand Ronis

Product type Nut Fix

Product Description

The RONIS 26200 Nut Fix Master Keyed Camlock is a high-quality, reliable locking solution designed primarily for metal cupboards, lockers, and office furniture. Featuring a 30mm body length and a bright chrome finish, this camlock combines durability with a clean, professional aesthetic.

Operating on the KT Master Key Series, this wafer-mechanism lock offers up to 2,000 key combinations (differs), providing a high level of key security for commercial and personal storage. The lock is designed with a round face and is secured in place using a robust nut fixing. It features a versatile 180° clockwise and anti-clockwise movement, ensuring smooth operation, and is supplied complete with two keys.

Whether you are replacing an existing lock or installing a new security system for office cabinets, the Ronis 26200 provides a dependable, master-keyed solution.

Brand Profile

Ronis

RONIS is an industrial locking brand best known for the unglamorous-but-essential stuff that keeps the modern world closed: **cam locks, quarter-turn locks, enclosure locks, locker/furniture locks**, and other OEM-friendly locking components used in **electrical cabinets, switchgear, lockers, vending/utility enclosures, postal equipment, and industrial furniture**. It's the kind of brand you don't notice until a whole site can't open a cabinet, and then suddenly it's the main character.

Today, **RONIS is a brand within the DOM Security group** (often referenced as **DOM RONIS**), and it's positioned as one of the major players in **industrial locks and mechanical components** for manufacturers.

What RONIS is really about is **OEM / turnkey supply**: providing manufacturers with ready-to-integrate locking solutions rather than one-off "retail" locks. DOM's own positioning for DOM RONIS is explicitly **designing, manufacturing and marketing OEM security systems for industry** and delivering **turnkey solutions**.

On the product side, the brand is heavily associated with **robust cam lock families**—e.g., models like the **RONIS 8800 / 32150 / 1710** ranges are described as cast, one-piece bodies aimed at durability and proven performance (the "this cabinet will be opened 12,000 times and nobody will lubricate it" design philosophy).
