**Specification Summary**

Brand Ronis

Product type Nut Fix

## Product Description

The RONIS C4 Combination Operated Nut Fixed Cam Lock is a highly convenient, keyless security solution designed for dry, indoor environments such as schools, offices, gyms, and workplaces. Featuring a robust 4-wheel combination mechanism, it offers up to 10,000 unique, user-resettable codes, making it an ideal choice for lockers, cabinets, and wooden or metal furniture.

This model features a 30mm body length and is secured in place with a reliable nut fixing. Its user-friendly design includes a shaped dial edge for an easy grip, even with wet hands, and a simple code-change process. For added peace of mind, the lock features a patent-protected detector plate and an integrated key override. If a code is forgotten, the override key (sold separately) can be used to quickly identify the current code and reset the lock.

Please note that the override/reset key is not included and must be purchased separately.

## Technical Specifications

- **Body Length:** 30mm
- **Body Diameter:** 19.1mm
- **Head Diameter:** 56.9mm
- **Head Shape:** Round
- **Finish:** Black
- **Fixing Type:** Nut fixing

## Brand Profile

Ronis

**RONIS** is an industrial locking brand best known for the unglamorous-but-essential stuff that keeps the modern world closed: **cam locks, quarter-turn locks, enclosure locks, locker/furniture locks**, and other OEM-friendly locking components used in **electrical cabinets, switchgear, lockers, vending/utility enclosures, postal equipment, and industrial furniture**. It's the kind of brand you don't notice until a whole site can't open a cabinet, and then suddenly it's the main character.

Today, **RONIS is a brand within the DOM Security group** (often referenced as **DOM RONIS**), and it's positioned as one of the major players in **industrial locks and mechanical components** for manufacturers.

What RONIS is really about is **OEM / turnkey supply**: providing manufacturers with ready-to-integrate locking solutions rather than one-off "retail" locks. DOM's own positioning for DOM RONIS is explicitly **designing, manufacturing and marketing OEM security systems for industry** and delivering **turnkey solutions**.

On the product side, the brand is heavily associated with **robust cam lock families**—e.g., models like the **RONIS 8800 / 32150 / 1710** ranges are described as cast, one-piece bodies aimed at durability and proven performance (the "this cabinet will be opened 12,000 times and nobody will lubricate it" design philosophy).
