Specification Summary

Brand	Squire
Product type	Padbolt

Product Description

The Squire Combi 4 Die Cast Combination Bolt offers a robust, keyless security solution for securing sheds, gates, cupboards, garages, and storage areas. Engineered with a durable die-cast lock body and a solid steel bolt, this locking bolt provides reliable protection without the hassle of carrying or losing keys. It is highly resistant to harsh weather conditions, making it completely rustproof and suitable for both indoor and outdoor use.

Equipped with a 4-wheel combination mechanism, the Combi 4 offers up to 10,000 resettable code options and features high pick resistance. For enhanced security, the bolt is lockable in both the open and closed positions and is supplied with one-way clutch head security screws to prevent unauthorised removal. Whether used for shared access in light commercial environments or for domestic outbuildings, this versatile combination bolt delivers peace of mind and long-lasting durability.

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK’s oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire’s own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country’s lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: “we’ve been thinking about forced entry since muskets were a performance upgrade.”

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited**.

What Squire is known for

Squire’s modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own “About” page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world’s strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
