Specification Summary

Brand	Union
Product type	Open Shackle

Product Description

The UNION 3102 Brass Open Shackle Padlock is a high-quality, UK-manufactured security solution designed for both general use and specialised environments. Featuring a solid brass body paired with a robust bronze shackle, this padlock offers exceptional corrosion resistance, making it highly durable against harsh weather conditions.

Its non-sparking brass and bronze construction makes it an ideal choice for use in sensitive or sparking environments, such as chemical plants, fuel depots, or industrial sites. The padlock operates with a convenient snap-locking mechanism, allowing it to be locked without the key in place, while requiring the key to unlock.

This padlock is available in multiple body widths (40mm and 50mm) and can be supplied either Keyed to Differ or Keyed Alike. Please select your preferred body width, keying option, and weight from the options below.

Technical Specifications

- **Brand:** UNION
- **Manufacturer Reference:** 3102
- **Body Material:** Solid brass
- **Shackle Material:** Bronze
- **Body Finish:** Polished Brass
- **Body Width:** 40mm or 50mm (please choose from the options below)

Brand Profile

Union

ASSA ABLOY

UNION is one of the big heritage names in **British-designed locks and door hardware**, with roots going back to **1840** in **Willenhall** (aka the Black Country's lockmaking mothership). What started as a family business grew into a widely specified brand for everything that "goes on a door," and UNION still leans hard into that *made-for-the-trade, won't-let-you-down* identity.

Today, UNION sits inside **ASSA ABLOY Opening Solutions UK & Ireland**, and the brand acts like a hub for a wider family of door-hardware ranges. In recent years, brands like **Exidor** (panic/exit hardware), plus **Dale Hardware** and **Excel Architectural Hardware**, were brought into the broader "UNION family" after ASSA ABLOY acquisitions. It's basically the Avengers, but instead of saving the universe they just make sure fire exits actually work at 3am.

What UNION is known for:

- A huge spread of **locks and cylinders** (mortice locks, euro cylinders, padlocks, etc.)
- The broader architectural hardware ecosystem: **door controls, exit hardware, hinges, handles, accessories**, and spec/support tooling aimed at installers and ironmongers
- A strong UK trade presence and long distributor relationships (Aldridge even called out a **60-year partnership** publicly).
