Specification Summary

Brand	Union
Product type	Cylinder - Euro Lock Case

Product Description

The UNION L2149 Euro Profile Mortice Deadlock Case is a high-quality, UK-manufactured deadlock designed for timber doors. This is a "case only" product, meaning it is operated by a standard euro profile cylinder (sold separately), allowing you to choose the exact level of cylinder security and keying requirements you need.

This deadlock case is available in multiple configurations to suit your installation. It features a choice of backsets (44mm or 57mm) and corresponding case depths (64mm or 75mm). You can also select from two durable finishes: Polished Lacquered Brass or Satin Chrome. The weight of the lock case varies between 580g and 640g depending on the size selected. Please choose your preferred backset, case depth, and finish from the options below.

To protect against physical attack, the brass deadbolt is reinforced with hardened steel rollers, providing excellent resistance to sawing. It is suitable for both left and right-handed timber doors and is certified to EN 1634-1 for use on 60-minute timber fire doors.

Technical Specifications

- **Manufacturer Reference:** L2149
- **Mechanism:** Euro Profile Cylinder (sold separately)
- **Backset:** 44mm or 57mm (please select below)
- **Case Depth:** 64mm or 75mm (please select below)

Brand Profile

Union

ASSA ABLOY

UNION is one of the big heritage names in **British-designed locks and door hardware**, with roots going back to **1840** in **Willenhall** (aka the Black Country's lockmaking mothership). What started as a family business grew into a widely specified brand for everything that "goes on a door," and UNION still leans hard into that *made-for-the-trade, won't-let-you-down* identity.

Today, UNION sits inside **ASSA ABLOY Opening Solutions UK & Ireland**, and the brand acts like a hub for a wider family of door-hardware ranges. In recent years, brands like **Exidor** (panic/exit hardware), plus **Dale Hardware** and **Excel Architectural Hardware**, were brought into the broader "UNION family" after ASSA ABLOY acquisitions. It's basically the Avengers, but instead of saving the universe they just make sure fire exits actually work at 3am.

What UNION is known for:

- A huge spread of **locks and cylinders** (mortice locks, euro cylinders, padlocks, etc.)
- The broader architectural hardware ecosystem: **door controls, exit hardware, hinges, handles, accessories**, and spec/support tooling aimed at installers and ironmongers
- A strong UK trade presence and long distributor relationships (Aldridge even called out a **60-year partnership** publicly).
