**Specification Summary**

Brand	Willenhall Locks
Product type	5 Lever

**Product Description**

The Willenhall Locks G17 is a robust, face-fixed 5-lever hookbolt gate lock designed to provide reliable security for gates. Featuring a 32mm backset and a durable satin brass finish, this lock is ideal for external gate installations where strength and security are paramount.

One of the standout design features of the G17 is the inclusion of 'steady' bolts located at both the top and bottom of the lock case. These steady bolts prevent the gate from being lifted, ensuring the hookbolt cannot be forced open or released. The hookbolt itself can be conveniently locked or unlocked by key from either side of the gate, offering flexible access control.

Supplied keyed to differ with two keys, the Willenhall G17 is a dependable security solution. For added protection and neatness of installation, an optional steel locking box is also available.

## Technical Specifications

- **Brand:** Willenhall Locks
- **Mechanism:** 5 Lever
- **Backset:** 32mm
- **Case Depth:** 60mm
- **Case Height:** 108mm
- **Fixing Centres:** 132mm

## Brand Profile

Willenhall Locks

**Willenhall Locks** is a trade-familiar UK lock brand built around the classic **mortice lock** lineup: **5-lever deadlocks, sashlocks**, and a handful of **specialist cases** for awkward door types (plus some gate kit). The branding leans into Willenhall's identity as the historic heartland of British lockmaking, and retailers commonly describe the range as being supplied for **50+ years**.

What you typically see under the Willenhall name:

- **Mortice deadlocks & sashlocks** (often 5-lever) for domestic/commercial doors.
- **Narrow-stile / euro sashcases** for glazed and French doors (e.g. the **EP1 Euro Sashcase**, which is explicitly pitched as a narrow-stile solution).
- **Gate locks** using **hook bolt** formats (Aldridge lists models like **G10 / G14 / G17** as 5-lever gate locks).
- Some sellers also group in **slamlock**-type products under the Willenhall label (auto-locking on close—great for security, occasionally *too* great if you enjoy being locked out of your own life).
