## Specification Summary

Brand	Yale
Product type	Open Shackle

## Product Description

The Yale 750 Brass Open Shackle Padlock is a robust and dependable security solution designed for general-purpose locking applications. Featuring a solid brass body with a polished brass finish and a hardened steel shackle, this 50mm padlock offers reliable protection for your belongings.

This padlock is supplied with two keys and is available in multiple keying configurations to suit your security requirements. You can choose between Keyed to Differ (where each lock has its own unique key) or Keyed Alike (where multiple padlocks can be opened with the same key, specifically keyed to key code 4A771). Please select your preferred keying option and barcode from the options below.

## Technical Specifications

## Brand Profile

Yale

**Yale** is one of the most recognisable names in locks and home security — the kind of brand that’s become so default it’s basically a synonym for “lock” in a lot of people’s heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada, Yale is an ASSA ABLOY brand**, and Yale’s own regional “About” pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY’s Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY’s acquisition of **August Home** (completed in **December 2017**), which fed into the broader “smart access” push around app-based entry and connected ecosystems.
