Product Description

The Yale Replacement Cylinder Backplate (manufacturer reference: 833765101168) is a genuine Yale spare part designed for use when fitting or replacing a Yale rim cylinder. Constructed from solid, durable steel, this plate provides a secure mounting base for the cylinder on the door.

This backplate is specifically designed for use with nightlatches featuring a standard 60mm backset. It features a 14.2mm central hole to allow the cylinder tailbar to pass through smoothly, and has standard 21mm screw centres for easy alignment and installation. Whether you are replacing a worn-out component or installing a new rim cylinder, this genuine Yale accessory ensures a reliable, professional fit.

## Brand Profile

Yale

**Yale** is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada, Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
