Specification Summary

Brand	Yale
Product type	Nut Fix

Product Description

The Yale S236 is a square-faced nut fix camlock designed for securing cabinets, cupboards, lockers, and other small enclosures. Featuring a robust chrome-plated finish, this compact lock has a 19mm body length and operates with a 180° anti-clockwise turn.

Please note that this camlock is supplied without a cam bar (available separately) to allow you to select the correct size and style for your specific application. It comes complete with two keys as standard.

This product is available in multiple keying options (Keyed Alike or Keyed To Differ) and barcodes. Please select your preferred options from the list below.

Brand Profile

Yale

Yale is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada, Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
