Specification Summary

Brand	Yale
Product type	Open Shackle

Product Description

The Yale Y220B High Security Open Shackle Weatherproof Padlock is designed to provide robust security for outdoor environments, making it ideal for securing sheds, gates, and other high-value outdoor items. Built with a solid steel body and a hardened steel shackle, this padlock offers exceptional resistance against physical attacks. It has been rigorously tested to EN 12320:2012, proving its strength against cutting, twisting, and pulling forces.

Engineered to withstand harsh weather, the Y220B features a protective cover over both the lock body and the shackle, alongside a dedicated keyhole cover to prevent water and dirt ingress. It has been tested for up to 120 hours of corrosion resistance, ensuring long-lasting outdoor performance. For enhanced security, the padlock utilizes a 5-pin cylinder and a double ball locking mechanism to resist picking and pulling.

This padlock is available in multiple body widths ranging from 51mm to 71mm, with weights ranging from 300g to 890g. It can be ordered in pack quantities of 1 or 3, and is available in both Keyed Alike and Keyed To Differ options. Please select your preferred body width, keying option, and pack quantity from the options below.

Technical Specifications

- **Standards:** Tested to EN 12320:2012 (CEN Grade 2)
- **Corrosion Resistance:** Tested up to 120 hours
- **Body Material:** Solid steel with protective cover
- **Shackle Material:** Hardened steel with protective cover
- **Cylinder:** 5-pin cylinder
- **Locking Mechanism:** Double ball locking
- **Keys Supplied:** 3 keys
- **Body Widths:** 51mm, 61mm, or 71mm (choose from options below)
- **Keying Options:** Keyed Alike or Keyed To Differ (choose from options below)
- **Pack Quantities:** 1 or 3 (choose from options below)

Key Features

- **Weatherproof Protection:** Protective cover on the lock body, shackle, and keyhole to prevent water and dirt ingress.
- **High Security Shackle:** Hardened steel shackle resists cutting, twisting, and pulling attacks.
- **Double Ball Locking:** Provides extra resistance against pulling and prying attacks.
- **Corrosion Resistant:** Tested up to 120 hours to ensure reliable outdoor performance.
- **Flexible Options:** Available in multiple sizes, pack quantities, and keying configurations to suit your security needs.

Brand Profile

Yale

Yale is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada, Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
